Work Experience

Intern Developer at Rush Hour Media

June – August 2016

- Developed a franchise page for Studio Fitness, Hong Kong using SCSS, WordPress CMS and JS where the client can upload videos about their products.
- Rebuilt the UI of an outdated library website for Alliance Française, Hong Kong(AFHK) named Médiathèque using CSS and JavaScript without modifying any HTML content.
- Integrated the Google Maps API and Slick.js plugin to create the "Locations" and "Testimonials" section of the main AFHK website.
- Performed routine QA checks on existent projects and reported any inconsistencies on JIRA and Trello.
- Received hands-on experience on how to create more elegant, user friendly websites with Responsive Design.
- Worked collaboratively in an Agile environment with a team of 4 and reported all progress in weekly meetings.

Full-Stack Developer Intern at RightBlue Labs

June – November 2015

- Designed in collaboration with a team of 4 an athlete monitoring system known as Logit through knowledge of JavaScript and Django, now used by over 300 users and 5 Canadian Olympic teams.

Projects   EzPlan

- Led a team of 4 as a Project Manager using Agile and Scrum methodologies to create an app which allows students to track which classes their friends have signed up for so they can take the same class.
- Developed and Debugged numerous features of the app including the UI of the landing page using Responsive Design, HTML/CSS and jQuery.
