Technical Skills

HTML/CSS, HTML5, CSS3, JavaScript, jQuery, Python, SASS, Node.js, Django, PHP, MySQL, MongoDB

Work Experience

Intern Developer   Rush Hour Media   June 2016 – August 2016   Hong Kong

- Developed a franchise page for Studio Fitness Hong Kong using SASS, WordPress CMS and JS which the client uses to upload videos about their products showing excellent creativity and technical skills.
- Styled and rebuilt an old library website for Alliance Francais, Hong Kong named Mediatheque using CSS and JavaScript demonstrating excellent technical capability, attention to detail and teamwork skills
- Authored and Styled the main website for Alliance Francais using JavaScript, SASS, Drupal CMS, HTML and PHP in collaboration with another developer exhibiting great teamwork skills.
- Performed routine QA checks on existing projects using the bug tracking tool JIRA in collaboration with a team of 5 including members with expertise in Marketing, Branding, Graphic Design as well as Web Design showing excellent communication, co-ordination and teamwork skills

Full-Stack Developer Intern   RightBlue Labs   June 2015 – November 2015   Toronto, Canada

- Designing in collaboration with 3 group members an athlete monitoring system known as Logit through knowledge of JavaScript and Django improving teamwork and communication skills and attracting over 300 users.
- Enhancing front-end design of the calendar page of the app where athletes and coaches are able to book training sessions within their teams. This was achieved through my extensive knowledge of HTML5, JavaScript and jQuery improving user experience by 25% by reducing the number of page redirects.
- Improving user experience of various other pages such as the personal sessions page where athletes are able to record their progress after a training session. This was done by enhancing code efficiency and reducing runtime exhibiting attention to detail and excellent critical thinking skills.

Personal Projects

Identity   **https://identity-shreykumar.herokuapp.com/**

- Built a web application independently from scratch which allows users to store and sync their important contacts remotely exhibiting excellent critical thinking and creativity skills.
- Created a dynamic storing mechanism through knowledge of AngularJS and Node.js reducing the total runtime by 50%.
- Designed the UI and front end through jQuery and JavaScript creating a better user experience.

UDown   **Group of 4**

- Designed and developed a study buddy finding application which allows you to find study buddies around you who what to study the same subject. Also allows users to hire tutors for study sessions.
